Description

The "Three Orbs" concrete sphere fountain is a focal point of modern landscape architecture. Combining the raw organic texture of high-grade concrete with the relaxing acoustics of flowing water, this centerpiece creates an atmosphere of tranquility and luxury.

Key Features:

- **Material:** High-performance Glass Fiber Reinforced Concrete (GFRC), engineered for extreme weather resistance and frost durability.
- **Closed-Loop System:** Operates on a self-contained water recirculating system with an efficient submersible pump (no direct water supply needed).
- **Illumination:** Integrated LED lighting at the water outlets provides breathtaking nighttime aesthetics.

- **Craftsmanship:** Individually hand-finished surfaces giving each sphere distinct tactile depth.

Ideal For: Private gardens, residential courtyards, commercial entrances, hotel patios, and retail public spaces.
