Description

The "Oasis" water wall is engineered for modern interiors—offices, hotels, restaurants, and upscale homes. Serving as a sophisticated partition wall for space zoning, it performs an essential wellness role: continuous water evaporation naturally humidifies indoor air, suppresses dust particles, and enhances acoustic comfort by softening ambient noise.

Crafted from tempered glass, high-grade stainless steel, or smooth architectural concrete. The splash-proof design protects surrounding furniture and flooring, while the closed loop circulation system ensures effortless operation.

Custom dimensions, exclusive design, and full assembly service available.
