Description

The "Monolith" garden fountain is designed for those who appreciate natural aesthetics and timeless grandeur. Crafted as a massive, dark-textured boulder, it features a gentle bubbling water jet at the top that smoothly cascades down the stone surfaces.

Engineered from high-strength architectural fiber concrete (GFRC) with specialized additives, it delivers complete frost resistance, UV durability, and weather endurance. Operating on a fully closed water loop, this fountain blends seamlessly into evergreen plantings, gravel beds, stone paving, and outdoor relaxation zones.

Handcrafted quality, natural stone texture, durable construction, and custom order manufacturing directly from the maker.
